■ SUMMARY

I design student-centered platforms with real workflows: assessments, dashboards, realtime feeds, PWAs, and Android-ready builds. My work sits between system planning and product polish - mapping the data model, wiring the backend, building the interface, then packaging it for web and mobile use.

Open to internships, junior developer roles, freelance builds, and student-facing product work.

■ PROJECTS

CareerGuide - Career Guidance Platform

careerguide1.onrender.com

Converts student skills assessments into course recommendations and progress tracking

Counselor workflows, portfolio evidence, 6 skill paths, 4 user roles

Stack: PHP, MySQL, Bootstrap, JavaScript, Android

CampusSpill - Anonymous Realtime Student Network

campusspill.onrender.com

Realtime posting with Supabase-backed interactions and anonymous posts

Installable PWA behavior and mobile-ready APK packaging

Stack: PHP, Supabase, JavaScript, PWA, APK

■ CAPABILITIES

Product architecture - structuring users, roles, data, and workflows before screens

Full-stack execution - frontend interfaces to PHP backends, MySQL, and Supabase

Mobile-ready delivery - PWAs and Android wrappers that feel close to native

■ STACK

PHP | MySQL | Supabase | JavaScript | React | Tailwind CSS

PWA | Bootstrap | Android packaging

■ TOOLS

Git / GitHub | Vite | GitHub Actions + Pages | Render | Supabase

■ EDUCATION

Southeast Asian Institute of Technology

[Degree program - expected graduation year]
